

PRODUCT REQUIREMENTS DOCUMENT

Freshworks Platform — freshworks.com

Version: 2.0 | Date: September 2026 | Prepared for: Hi Tech Agentic Test Pipeline
Start URL: <https://freshworks.com>

1. Overview

Freshworks is a cloud-based SaaS suite. This PRD covers exactly 3 user flows for the Kane-CLI agentic pipeline. Each flow has a single, focused acceptance criterion to keep test generation fast and deterministic.

2. Scope — 3 User Flows Only

- Flow 1: Homepage — verify the page loads and the primary CTA is visible
- Flow 2: Login — verify invalid credentials show a clear error message
- Flow 3: Pricing — verify plan cards are displayed with prices

3. Functional Requirements

3.1 Homepage

REQ ID	Requirement	Acceptance Criteria
HP-01	Homepage loads with a visible hero headline and a 'Get a demo' CTA button	Navigating to https://freshworks.com renders the page; a hero headline is visible above the fold; a 'Get a demo' or 'Start for free' button is present and clickable.

3.2 Login — Invalid Credentials

REQ ID	Requirement	Acceptance Criteria
LG-01	Login page is reachable from the top navigation	Clicking 'Login' in the top nav opens the login page without a 404 or redirect error.
LG-02	Wrong credentials display an error message without crashing the page	Entering a random email and incorrect password and submitting shows an 'Invalid email or password' (or equivalent) error; the page does not crash or redirect unexpectedly.

3.3 Pricing Page

REQ ID	Requirement	Acceptance Criteria
PX-01	Pricing page displays plan cards with visible prices	Clicking 'Pricing' in the top nav loads the pricing page; at least two plan cards are shown, each displaying a plan name, a price, and a CTA button ('Buy now' or 'Start free trial').

4. Test Scenarios (3)

These 3 scenarios are the direct input to the Kane-CLI agentic pipeline.

#	Scenario	Req ID	Priority
1	Homepage loads — hero headline and CTA visible	HP-01	P1
2	Login — wrong credentials show error message	LG-01, LG-02	P1
3	Pricing page — plan cards with prices displayed	PX-01	P1

5. Pipeline Configuration

- **requirements_doc:** freshworks_PRD.pdf
- **start_url:** https://freshworks.com
- **test_language:** javascript
- **max_tests_to_run:** 3

Required Secrets

- KANE_USERNAME / KANE_ACCESS_KEY — TestMu credentials
- LT_USERNAME / LT_ACCESS_KEY — LambdaTest credentials
