

PRODUCT REQUIREMENTS DOCUMENT

Freshworks Platform — freshworks.com

Version: 1.0 | Date: September 2026 | Prepared for: Hi Tech Agentic Test Pipeline
Start URL: <https://freshworks.com>

1. Overview

Freshworks is a cloud-based SaaS suite offering Customer Support (Freshdesk), IT Service Management (Freshservice), CRM & Sales (Freshsales), Live Chat (Freshchat), and an AI Platform (Freddy AI). This PRD defines the functional requirements and acceptance criteria for the five core user flows that the Kane-CLI agentic pipeline will test.

2. Scope

- Homepage navigation and primary CTAs
- Products menu — all Freshworks products accessible
- Pricing page — plan display and billing toggle
- User Registration — form validation only (no email verification required)
- Login — invalid credentials error message only (no real account needed)
- Demo request form — field validation and submission
- Freddy AI page — capabilities and CTA verification
- Resources — blog listing and article navigation

3. Functional Requirements

3.1 Homepage & Navigation

REQ ID	Requirement	Acceptance Criteria
HP-01	Homepage loads and hero is visible	Page renders at https://freshworks.com ; hero headline is visible; no console errors
HP-02	Top nav shows: Products, AI Platform, Resources, Pricing	All 4 items present; hovering opens a dropdown without page reload
HP-03	'Get a demo' and 'Start for free' CTAs are functional	'Get a demo' routes to demo form; 'Start for free' routes to signup page

3.2 Products Menu

REQ ID	Requirement	Acceptance Criteria
PR-01	Products dropdown lists all Freshworks products	Dropdown shows Freshdesk, Freshservice, Freshsales, Freshchat, Freshteam; each links to its product page

REQ ID	Requirement	Acceptance Criteria
PR-02	Each product page loads with features and a CTA	Product page renders; feature highlights visible; 'Start for free' or 'Get a demo' CTA present

3.3 Pricing Page

REQ ID	Requirement	Acceptance Criteria
PX-01	Pricing page accessible from nav	Clicking 'Pricing' loads the page in under 3 s; no 404 or redirect error
PX-02	Plan cards show name, price, features, and CTA	All plan cards display price and a 'Buy now' or 'Start free trial' button
PX-03	Annual / Monthly billing toggle updates prices	Toggling between Monthly and Annual recalculates displayed prices; toggle state is clearly shown

3.4 User Registration — Form Validation Only

REQ ID	Requirement	Acceptance Criteria
RG-01	Registration page opens from hero CTA	URL changes to /signup; form contains email, name, and password fields
RG-02	Form rejects empty fields and invalid email formats	Empty submit shows inline errors on all required fields; non-work email (Gmail/Yahoo) shows 'Please use your work email' message; no network request is made

3.5 Login — Invalid Credentials Only

REQ ID	Requirement	Acceptance Criteria
LG-01	Login page reachable from nav	Clicking 'Login' in the top nav opens the login page; no 404 or redirect error
LG-02	Wrong credentials show a clear error message	Entering a random email and wrong password and clicking Sign In shows 'Invalid email or password' or similar; page does not crash

3.6 Demo Request Form

REQ ID	Requirement	Acceptance Criteria
DM-01	Demo form opens from 'Get a demo' CTA	Form contains: First Name, Last Name, Work Email, Phone, Company, Team Size fields
DM-02	Form validates all required fields	Empty submit highlights missing fields with error messages; form not submitted until all required fields filled
DM-03	Valid submission shows confirmation	All fields filled with valid data → thank-you message or confirmation page displayed; no JS errors

3.7 Freddy AI Page

REQ ID	Requirement	Acceptance Criteria
AI-01	Freddy AI page opens from 'AI Platform' nav item	Clicking 'AI Platform' navigates to the Freddy AI page; headline or page title references 'Freddy' or 'AI'
AI-02	Page lists at least 3 AI capabilities with descriptions	Freddy Copilot, Freddy Insights, and Freddy Self Service (or equivalent) are listed; each has a short description text
AI-03	A CTA button is present on the AI page	'Get a demo' or 'Start for free' button is visible; clicking it routes to the correct form or signup page

3.8 Resources — Blog

REQ ID	Requirement	Acceptance Criteria
RS-01	Resources dropdown is accessible from nav	Hovering on 'Resources' shows a dropdown containing a Blog link; link is not broken
RS-02	Blog listing page renders article cards	Navigating to the blog page shows at least 3 article cards each with a title and a clickable link
RS-03	A blog article opens and displays content	Clicking any article card loads the full article page; title and body text are visible; page returns HTTP 200

4. Non-Functional Requirements

REQ ID	Requirement	Acceptance Criteria
NF-01	Page load $\leq$ 4 seconds	Homepage, pricing, signup, and login pages each load fully within 4 seconds
NF-02	All primary pages served over HTTPS	HTTP requests redirect to HTTPS (301); no mixed-content warnings
NF-03	No broken primary links	All nav items, footer links, and primary CTAs return HTTP 200

5. Test Scenarios (10)

These 10 scenarios are the direct input to the Kane-CLI agentic pipeline. Each maps to the requirements above and is ordered by priority.

#	Scenario	Req IDs	Priority
1	Homepage loads — hero headline and CTAs visible	HP-01, HP-03	P1
2	Navigation — all 4 nav items open correct dropdowns	HP-02	P1
3	Products menu — all products listed and pages open	PR-01, PR-02	P1
4	Pricing page loads with plan cards	PX-01, PX-02	P1
5	Pricing — Annual/Monthly toggle updates prices	PX-03	P1
6	Signup — empty form and invalid email are rejected	RG-01, RG-02	P1
7	Login — wrong credentials show error message	LG-01, LG-02	P1

#	Scenario	Req IDs	Priority
8	Demo form — required field validation works	DM-01, DM-02	P1
9	Freddy AI page — capabilities and CTA visible	AI-01, AI-02, AI-03	P1
10	Blog — listing loads and article opens correctly	RS-01, RS-02, RS-03	P2

6. Pipeline Configuration

- **requirements_doc:** freshworks_PRD.pdf
- **start_url:** https://freshworks.com
- **test_language:** javascript
- **max_tests_to_run:** 0 (run all 10)

Required Secrets

- KANE_USERNAME / KANE_ACCESS_KEY — TestMu credentials
- LT_USERNAME / LT_ACCESS_KEY — LambdaTest credentials
